I hope you all enjoyed the special April issue. It would have worked out better if I hadn't forgotten to include the Managing Editor's page. Again... Oh well.

Welcome to our new Clandestine writer: longtime ACE member Vincent Havrilko has offered to keep the column alive. His first effort appears in this issue. Please give Vincent your support; reports can be emailed to raptor1@kda.attmnl.ne.jp or snail mailed to him at the address on the back cover (unless you check the April issue).

The dad-ratted snow seems to be a thing of the past; daffodils are blooming and the lilac is showing leaf. Must be Spring is around the corner. Time to check out the damage to your antenna system and improve the Ground in time for next autumn's improved Dxing conditions.

Onward...!

(Next deadline for submissions: 18th May, 2004)

Format of a log entry:

Date Heard / Time Heard (in UTC) / Frequency (in kHz) / Mode / Details of Transmission

Modes:

A = AM F = FM L = Lower Sideband U = Upper Sideband

Reporting a signal's quality:

The simplest way of doing this is to judge the signal as being "Poor", "Fair" or "Good" and reporting it as such.

If you're one of them highfalutin' types with radios that are smarter'n your dawg, you probably use the SIO system

S = Signal (strength) I = Interference O = Overall (quality)

S, I and O are all rated between 0 and 5, 0 being worst, 5 being best. (As I recall, there were written tables for these values but I haven't seen one in a very long time. If you have the details somewhere, send 'em along to me!)

- 04/11/04, *0222-0226*, 6925U - woman discussing a number of health issues. (Pse QSL SM-OK Poor)
- 04/12/04, 0255-0257, 6955A - mx - weak signal. (Pse QSL SM-OK Poor)
- 04/12/04, 2229, 6925U - mx - "What a Wonderful World". (AF Poor)

MAIL DROPS

These are the relevant - for this month - addresses to which you should send your reports as appropriate (along with at least three first class stamps to handle mailing costs) if you're doing things by snail mail or if the station doesn't use email.

Don't forget that foreign drops need IRCs or dollar bills instead of US postage stamps.

Semi-foreign drops (read: Canadians) need cash or IRCs but might accept cowrie shells, beads or small hand mirrors. *Poutine* is an accepted medium of exchange only within the province of Quebec.

TEN (and TWENTY) YEARS AFTER...

MAY 1984:

The ACE was 20 pages with a headline about the bust of Radio Free Insanity. DiaLogs was 8 pages including 1 NAm MW (KPRC), 1 NAm FM (KPRC), 26 NAm SW (including KPRC), 1 Euro (Dublin), and 8 Clandestines reported by 36 (!) contributors. Due to the deluge of reports, the unIDs were held over to next month.

MAY 1994:

The ACE was 24 pages featuring The Radio Airplane on the cover. DiaLogs was 7 pages including 34 NAm SW, 1 DU SW (KIWI), and 21 unIDs from 18 reporters.

RAMBLINGS

Attention please, S-Mart shoppers! There will be a raffle next month so that we can buy a second single for that UNID that keeps on playing "Garden Party" over and over and over and over an.... Just think - a doubling of this individual's music library and all for less than two dollars! This boy makes Pig's Ear look good by comparison. Any monies left over from the raffle will be used to send this person a really nice fruit basket.

Important note: For a while now I've had a feeling that the Adelphia (my ISP) SPAM filtering system was a little too draconian - it doesn't keep a log of what it dumps - and I suspect that it may have been dumping the odd logging email now and then as a result. So, I resubscribed to Spamcop (www.spamcop.net) and am using that system to POP my incoming mail accounts, filter them and then drop the filtered emails into my mailbox. Spamcop also gives me excellent control over white/blacklisting folks sending me email so I shouldn't be having anything going astray again. If you hate email spam and want a good filtering and email service I can strongly recommend Spamcop at \$30 a year.

Speaking of email, Scruffy Swab of Iron Man Radio has a new email address - ironmanradio6925@hotmail.com - he very kindly sent me email informing me of this change. Make a note of it, folks!

Al "FCC" Fansome continues to be a big time contributor of loggings to this column. This boy hears it if it's on the air. In fact I wonder if he ever sleeps? Al, thank you - your stuff is greatly

appreciated by both the membership and myself, I'm sure. Hey, Krusty - how about we come up with a yearly bowling trophy for whoever does a real good job of sending in loggings????

Interesting toy department - No, this one doesn't need batteries and you can't get arrested for fondling it in public - <http://www.rfspace.com/sdr14.html> - this little dings and a fast hard drive can give you a capability that only our benevolent, caring pals in the government had before - it's a VCR for HF! This box and 52GB of space a day can record a 24 hour 150kHz segment of HF with full playback and tunability. What this means, Charlie, is that you could for example record from 6900 to 6980 kHz on Sunday night and play it back, tuning through it, looking for signals, on Monday morning. No more missing a signal because you were out or were listening to Rush on AM with your radio. This is not like using multiple radios and recorders to watch a number of frequencies - this is being able to replay the HF spectrum and tune through it looking for signals again!

In case you're wondering - no, the above isn't me pulling your leg - it really can do that and the technique has been in use for years - it's just that now the peasants can afford to use techniques and hardware that only the Feds could afford before.

You know, if this thing works as advertised, hot damn - I gotta get one!

A plea - your reports are very greatly appreciated but there are one or two things I'd like to mention in the hope of having my life made a little more easy -

Please, if you have multiple loggings of the same station on different occasions, put each logging on its own line. It's real hard to pick individual loggings out of a single dense paragraph of text.

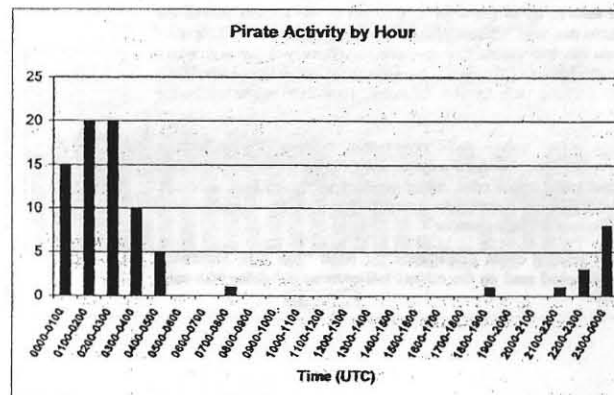

If you hear a tune and can identify it, please make sure that you identify it as music? Sometimes I can't tell if it's the title of a song or something that the announcer said that you're detailing. Also, if it's a cover of a tune (as opposed to the original version) please say so.

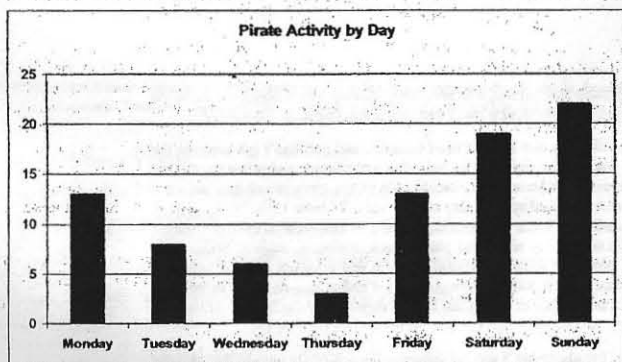

Addresses/drops - if you know I've got one wrong, or you can add information, please do so.

There, my cheap, selfish demands are done.

STATISTICS

Okay, we got the statistics at last. One important change - I now do it by UTC and not Eastern local time. This is to save time and because it hurts my brain trying to remember to compensate for all the differences. I spend way too much time on this damn column as it is instead of working in the radio room and getting *myself* a few QSL cards now and then!

You can see above in "Pirate Activity by Hour" that between about eight and eleven PM Eastern Time still provides your likeliest time to hear someone on.

Now, "Pirate Activity by Day" is trickier – don't forget that the UTC day is offset from the local day by between three and six hours depending upon where you are in the USA. Allowing for that, yup, Friday and the weekend are still the best days to listen.

***** PROPAGATION *****

What it is:

Okay, just like the sea, radio waves below a certain frequency display tide-like behavior that is dependent upon the time of day at your location and at the target location. (*Arrr, me hearties – 'tis a most appropriate metaphor!*) Listen for a given area at one time and you'll hear nothing. Listen, say, twelve hours later and you'll hear find you're looking for. That's a real simple description of a very complex subject.

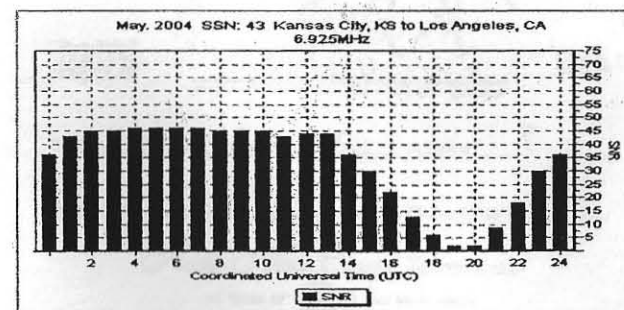

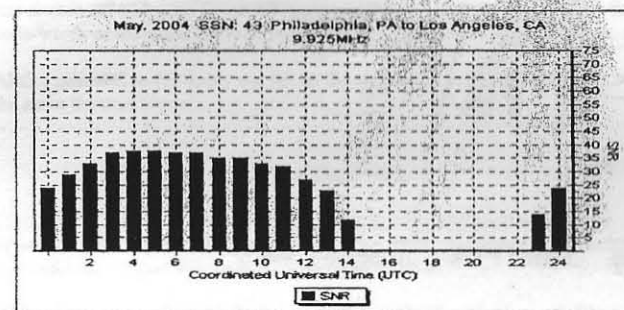

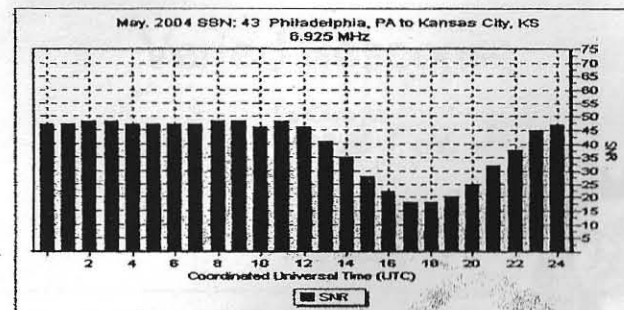

The tables below can be looked upon as being like tide charts for a certain part of the world and a certain frequency. The higher the "tide" displayed, the better the radio path between the two points on the chart at that time on that frequency.

To try to provide useful propagation for the ACE readership I cover the most common Pirate frequencies month by month and I produce tables that roughly divide the USA into eastern, central and western sections and the propagation paths between them.

If you live, say, in Boston and want to try to listen for KMUD out in the western part of the country, you would check the table that says "Philadelphia, PA to Los Angeles, CA". This chart shows the radio "tides" between the two points that approximate where you are and where KMUD might be. Now look at the height of the bars – between 0200 and 0900 (that's UTC) looks to offer the best east-west listening path for you. Likewise, 1600-2100 might not be the best time to listen.

Caveat: These charts are rough guides only – radio propagation is even stranger than a Republican Senator who believes that poor folk need a break more than the obscenely wealthy do – you sometimes hear the darnedest things come out of nowhere when you least expect it. Use them as a guide but don't let it stop you listening for a target when it says propagation is at its poorest – just use them as indicators of "best chances"!

If you want to do more serious reading about propagation the book "The New Shortwave Propagation Handbook" is a pretty good read on the subject and even us po' folks who can't afford RX-340s can understand it!

gnuz and gnotes...

Word from WBM (Black Mountain Radio) is that they will be using code-words or phrases in future broadcasts to weed out the fake reports. They'll also be using one-shot email addresses for each broadcast. They ask that you not mention the code-words or the email addys in your reports to publications or on the web.

ADD a new station (probably not yet on the air) to Box 1: Pirate Booty may be on the air in the near future.

Greetings from Kadena Air Base Okinawa, Japan! I would like to take this opportunity to thank John for granting me the privilege of writing this column. I know I can't fill George's shoes but I would like to add to the flavor of The A*C*E by reporting on some of the clandestines that are heard in this region of the globe. I welcome all A*C*E members to send in their loggings and other pertinent information regarding this fascinating subject.

I currently use an Icom R-75 and Grundig Satellit 800 with an end fed random wire mounted outside for my primary monitoring equipment.

This month's column will include some of my own loggings and those reported by other listeners in Japan. I will also present some information on the *Reform Party of Syria*. I highly recommend a regular perusal of an excellent website called www.clandestineradio.com. Much of the information in this column is gleaned from this website. It has loads of useful information, including audio clips, broadcast schedules, and news bulletins to aid you in your search and understanding of clandestine broadcasting. Let's get on with the logs.

Korea (Rep)

The Republic of Korea currently has four active clandestine stations. They include Echo of Hope, Voice of the People, Free North Korea Broadcasting (internet-based), and R. Free Asia; the latter utilizes transmitters outside of the Korean Republic.

All dates/times in UTC

Echo of Hope (Kyyongi-do) - The organization behind this station is said to be Koreans Living Abroad (Agency for National Security Planning - clandestineradio.com)

6.348 / KK / 2/17 / 1228 / 423-332 / AM / OM anc w/ tk in KK; heavily jammed
3.985 / KK / 2/21 / 1728 / 433 / AM / YL anc w/ tk in KK; jamming only moderate
3.985 / KK / 3/22 / 1100 / 444 / AM / S/on @ 1100; jamming QRM only slight; OM/YL w/ tk

Voice of the People (Kyyongi-do) - The organization behind this station is Korean Workers' Union (reported to be, in fact, the Korean Armed Forces - clandestineradio.com)

6.600 / 2/17 / 1145 / 433-534 / AM / YL w/ tk in KK; moderately jammed
3.912 / 2/21 / 1724 / 422 / AM / YL w/ vocals; heavily jammed

Myanmar

Democratic Voice of Burma - Logging Tentative

5.945 / 3/21 / 2328 / 131-121 / AM / YL w/ tk in vern; mx; jammer QRM obliterated signal @ 2345; the scheduled time only allows me to monitor them on weekends. Station is an anti-Myanmar government clandestine.

Kashmir (de facto)

Jammer

5.102 / 3/22 / 1203 / 253 / ? / This jammer has been heard hear almost on a daily basis. I have heard some programming at times but nothing discernable. I will maintain a watch from 1300 - 1430, which is when this anti-Indian government station is scheduled.

Others

Some other stations audible in this area and logged by others in Japan have helped me build a database, which I input into my receivers. I have targeted these stations for future reception and hope to be able to report on them in future columns.

Laos / Hmong Lao Radio / 15.260 / 0100
Eritrea / VO Liberty / 15.675 / 0400
Kashmir (de facto) / VO Jammu Kashmir Freedom / 5.102 / 1259
Vietnam / New Horizon Radio / 9.585 / 1330
Vietnam / Que Huong Radio / 9.930 / 1331
Syria / Arabic Radio / 7.470 / 1622
Iran / Radio Sedaye Iran / 7.580 / 1630
Kurdistan (de facto) / VO Mesopotamia / 11.530 / 1647
Iran / R. International / 7.490 / 1730
Ethiopia / VO Oromiyaa / 7.560 / 1730
Ethiopia / VO Oromo Liberation / 9.820 / 1700 (Mon-Thur)
Kurdistan (de facto) / Mesopotamian Radio & Television / 7.560 / 1700 (Wed - Fri)

Reform Party of Syria

An interesting article appeared in the web pages of Clandestineradio.com on February 29 regarding Syria's first pro-democracy radio station. The Reform Party of Syria (Hizb al-Islah Al-Souri) announced that it would run test broadcasts on the internet beginning 31 March of its Radio "Free Syria" program.

The programming content will be political, economic, and social in nature. The aim is to highlight the benefits of a democratic way of life to those in Syria living under the repressive Ba'ath regime. The press release also claimed that the station was financed 100% by Syrian businessmen. Obviously, they feel the current government is not advantageous to their business ventures.

Although this will begin as an Internet only test, plans are to broadcast radio signals to Syria via Cyprus. To the best of my knowledge, I do not have any information as to what frequencies will be used. I remember seeing a MW frequency mentioned but I couldn't locate where I saw the information. For those wanting more information, check www.reformsyria.com.

Closing Comments

Once again, I would like to thank The A*C*E for this opportunity to give back a little to a group and a hobby that's provided me with a great deal of interest and enjoyment throughout these years.

In addition, I'm looking for a simple MUF / propagation program to help with my column. I would like to analyze whether or not a station heard here is audible in North America. Please contact me at raptor1@kda.attmil.ne.jp.

Finally, I would like to recommend www.globalsecurity.org as one of the best sources of unclassified intelligence information available to the public. It includes intelligence reports plus satellite photos! Keep a close eye on this site because information here could lead to the discovery of new clandestines. Using this site along with www.clandestineradio.com can be a powerful research tool in clandestine chasing.

Look forward to hearing from you!

The A*C*E is an association of individuals who find pirate, clandestine and covert communications an interesting part of their radio listening hobby. The primary existence of the club revolves around the publication of a monthly bulletin, The A*C*E. The bulletin reports on pirate, clandestine, covert and other unexplained broadcasts. Also, the readers are provided with other available material concerning motives, explanations and the theories behind these various broadcasts and broadcasters. The ACE as an organization, does not encourage, support or condone any illegal activity; we simply seek to understand the nature and reasoning behind such broadcasts. If your interests include listening to pirate radio stations, clandestine broadcasts and covert communications, The A*C*E is for you!

All subscriptions, renewals, and queries regarding subscriptions should be sent to the above club address. Contributions for each editor should be sent to their own given addresses.
